

Curriculum Vitae

Profile

I am a driven and creative Part II architectural assistant with extensive experience, particularly in RIBA stages 0-3. I have worked on projects at varying scales throughout the UK with a particular emphasis on high end residential schemes. To add to this, I have led and delivered several small scale projects independent of my time in practice, all achieving full planning approval and have since been constructed.

My approach to design revolves around a response to the context and is heavily driven by narrative and story telling techniques. This can be seen through my response to various academic briefs, as well as the way in which I approach client driven proposals. Whilst at ON Architecture, I was part of the planning team. This experience enhanced my ability to work to a strict deadline, whilst juggling several projects at once which would translate into my further studies and my private proposals.

URAN JERLIJA

ARCHITECTURAL ASSISTANT
PART II
